UTSAV KANT JHA

Aspiring Data Analyst

Samastipur, Bihar 848127 | +91-9835599323 | utsavkant4@gmail.com | linkedin.com/in/utsav-kant-jha-211a553

PROFESSIONAL SUMMARY

Aspiring Data Analyst pursuing BCA, with hands-on experience in SQL, Python, Excel and Power BI gained through independent projects. Skilled in data cleaning, exploratory data analysis, and building interactive dashboards — demonstrated through a Zomato dataset analysis using Python and a Power BI sales dashboard with KPI tracking. Familiar with MySQL and PostgreSQL, with a strong foundation in turning raw data into clear, actionable insights.

EDUCATION

BCA, International School of Management (ISM), Patna *Expected Aug 2027*

Intermediate (12th), K.S.R.I. College Sarairanjan, Samastipur *2023*
Grade: 71% (PCM)

Matriculation (10th), High School Sarairanjan, Samastipur *2021*
Grade: 79%

SKILLS

Technical: SQL, Python, Microsoft Excel, Power BI

Concepts: Data Visualization, Data Cleaning, Data Modeling, Dashboard Development, Report Automation

PROJECT

Project: Live Weather Data Visualization Dashboard

- **Developed a live weather data visualization project using Python, OpenWeather API, CSV and Power BI.**
- **Fetched weather data for multiple cities using a Weather API and processed the data with Python.**
- **Created an interactive Power BI dashboard with city-wise temperature, weather conditions and time-based visualizations.**
- **Added city slicers, temperature cards and time-series charts to make the dashboard interactive.**
- **Implemented a workflow where updated API data can be loaded into the dashboard through Python and Power BI refresh.**

Technologies: Python | OpenWeather API | Pandas | CSV | Power BI | Data Visualization

Zomato Data Analysis *Python*

- Analyzed Zomato dataset using Python, Pandas, NumPy, Matplotlib and Jupyter Notebook.
- Cleaned missing values and duplicate records.
- Performed EDA to identify trends in ratings, cuisines, pricing and locations.

- Created charts and generated business insights.

Pizza Sales Analysis Dashboard

Power BI

- Developed an interactive Pizza Sales Dashboard using Power BI Desktop.
- Cleaned and transformed the sales data using Power Query.
- Created KPIs such as Total Revenue, Total Orders, Total Pizzas Sold, and Average Order Value.
- Built interactive charts and slicers to analyze sales by pizza category, size, and time.
- Identified key business insights to help understand sales performance and customer preferences.
